Paw Talk

Little Gucci, a precious 3 month old kitten needs your help!

Gucci was given her name after being carried around like a purse ever since she was rescued at the age of 4 days old. Abandoned by her mother, she was brought to Beamsville 4Paw Rescue for a chance to survive.

Born with tumors in her eyes, Gucci lost more than 80% of her vision. This left our little love unable to play, and explore like her playmates. Little Gucci is very loving, affectionate, will steal your heart with her adorable personality, and sweet face. You can't help but smile when you call her name and she runs to you like a trotting horse, putting her paws up to make sure nothing is in front of her.

Gucci tries to play like a typical kitten, however, every day the tumors grow making it harder for her to get around. When evening approaches, Gucci timidly feels her way around trying to find a soft, safe spot to curl up in, so she doesn't walk into walls, doors, or fall down the stairs.

Gucci could lose her eyes completely should the tumors continue to grow. As these tumors on her eyes increase in size, so will the pressure on her eyes causing total blindness, and intense pain. This precious little kitten will live in a world of darkness. We do have hope though. Together, we can save Gucci's eyes and give her the gift of sight. When the tumors are removed from her eyes, a new world will open up for Gucci, and she will be able to see!!!! The cost of helping little Gucci reach this new life is \$3,000.00. The surgery can be performed when she turns 6 months old.

Together we can save Gucci's eyes!
